### Yi2 WORK

Website: <https://www.comprarlotes.com/>

Developed the entire web system in Yii2, on this site people enter to register their batches of products so that later those interested can communicate with them via email.

The site has an admin area where you can see the uploaded batches, manage users, manage batches and other frontend options.

Website: <http://yahayboda.com/>

Develop the wedding package modules, the bride and groom registration system, all the options to register your wedding and the area of each client so that they can have something like jose.yahayboda.com from automatically. It is done in Yii2 in its entirety.

Website: <https://redmascotera.com/inicio.php>

Improve the lost pet registration forms and customer registration.

It's made in Yii2

Website: <https://floreriamundofloral.com/>

Improved the home page and re-checkout to make it easier to use.

Made in Yii2 and Laravel

Website: <https://cssma.space/>

Maked all site design changes, client sended the Ai files to change the site design.

Made in Yii

Website: <http://geoecuador.gistemp.com/>

Create the roles and permissions module for users.

Done in Yii2 but the client I think not payed the hosting.
